

Deep Dive

Team TMBJ

Taylor Norton, Matthew Vinson, Brandon Carter, Josh Braun

Overview

“Deep Dive” is a 2D video game from a side-on perspective. In this game, the player is a submarine that must dive down to the bottom of the ocean to collect sunken treasure, then return to the top of the ocean. However, the player must be careful because there are sharks, jellyfish and underwater mines that they could run into during their journey. Either zoom past these obstacles or shoot them with your torpedoes to avoid taking damage. Can you brave the depths of the ocean and attain great riches?

How to Play

- Move Up = W / Up Arrow key
- Move Down = S / Down Arrow key
- Move Left = A / Left Arrow key
- Move Right = D / Right Arrow key
- Fire Torpedo = Space
- Select Menu Option = Left Mouse Click
- Pause/Resume game = Escape

Winning and Losing

The objective of this game is to obtain the treasure at the bottom of the ocean and return back to the top of the ocean without losing all of your health. The player must go through three different levels, and in each level, the player must dive for the treasure and resurface. The player wins the game if they can achieve this objective and complete all three levels without taking too much damage. The player loses the game if they take enough damage from sea creatures or underwater mines to where they have no health left in any of the levels.
